

DIARY NOTES

DD/S

9 March 1971

Handwritten initials: MW

1. Visit of Walter Harrison (Architect): Colonel White noted correspondence he had had with Mr. Walter Harrison, the principal architect for the headquarters building, in which he invited Mr. Harrison to visit the building along with Mr. Fred King, an associate architect. Colonel White had learned that Mr. Harrison had never been in the building after it was constructed. He has arranged for Messrs. Harrison and King to come on 23 March and is attempting to have [REDACTED] present. I understand that this will involve both lunch and a tour. I suggested that Colonel White have [REDACTED] pictures available and this I gathered he had already suggested [REDACTED]

2. Replacement for [REDACTED] Colonel White telephoned to advise that the Director has selected [REDACTED] from OCI to replace [REDACTED] has been working on the PDB. Colonel White additionally appreciated the nominations we had made noting that each was an excellent candidate.

3. Rod Kreger/GSA: I asked for guidance from Colonel White in connection with the appointment we now have with Mr. Kreger, Deputy GSA Administrator. Colonel White asked that we use this meeting with Mr. Kreger as exploratory only both as to the construction and as to the commitment with A&E. Colonel White desires to have further discussion with us before any firm commitments are made. He again expressed the thought that it is probably quite late in the fiscal year to make any commitments.

4. [REDACTED] I also asked Colonel White if we could consider the [REDACTED] succession as approved. He believes that this is the fact but requested that we do a memorandum for the Director's approval in the same manner as we do for senior Agency officers.
